

MadGigz — App Store & Google Play listing pack

Everything you need to paste into **Google Play Console** and **App Store Connect**, in **English** and **Spanish (Spain)**. Character limits are noted on every text field — the copy is written to fit inside them. Fields you *choose* (categories, ratings) and *assets* you must supply (screenshots, graphics) are listed with recommended answers at the end.

Legal note (yours): competitor names stay out of published copy — none used here.

One-liner this is all built from: "MadGigz is a for-you page for local gigs —

scroll reels from independent artists near you, and buy the ticket in the same swipe."

1. GOOGLE PLAY — English

App name — max 30 characters (this text is 29)

MadGigz: Local Gigs & Tickets

Short description — max 80 characters (this text is 69)

Watch reels from local artists and buy gig tickets in the same swipe.

Full description — max 4000 characters

MadGigz is a for-you page for local live music. Scroll reels from independent artists playing near you.

No more hunting. No jumping from a post, to a bio link, to a ticket site, to your email. On MadGigz, it's all in one place.

FOR FANS

- A feed of reels, not a wall of listings – discover artists by watching, not by reading text.
- See what's on this week in your city.
- Buy tickets in seconds. Your QR ticket is always in your pocket.
- Add tickets to Apple Wallet or Google Wallet.
- Follow the artists you love and never miss their next show.
- Built for local, independent live music – the gigs actually happening around you, not stadium gigs.

FOR ARTISTS

- Post your show and link your reels – fans discover you by watching.
- Sell tickets in the app. No gatekeeping, no curation queue.
- Get paid out directly to your bank account.
- A simple, fair 5% fee, shown openly – and you're always free to keep selling through your own website.
- Scan tickets at the door, right from your phone.

Madrid first. More cities soon.

MadGigz – the local gig, in your pocket.

Release notes (this version) — max 500 characters

Welcome to MadGigz! Discover local gigs through artist reels and buy tickets in a swipe. This is the easiest way to find and buy local live music.

2. GOOGLE PLAY — Spanish (Spain)

App name — max 30 characters (this text is 27)

MadGigz: Conciertos Locales

Short description — max 80 characters (this text is 76)

Reels de artistas locales y entradas para sus conciertos, en el mismo gesto.

Full description — max 4000 characters

MadGigz es tu página "para ti" de música en directo local. Desliza reels de artistas independien

Se acabó buscar. Sin saltar de una publicación, al link de la bio, a una web de entradas, a tu c

PARA FANS

- Un feed de reels, no un muro de listados: descubre artistas viéndolos, no leyendo texto.
- Mira qué hay esta semana en tu ciudad.
- Compra entradas en segundos. Tu entrada QR siempre en el bolsillo.
- Añade tus entradas a Apple Wallet o Google Wallet.
- Sigue a los artistas que te gustan y no te pierdas su próximo concierto.
- Hecho para la música en directo local e independiente: los conciertos que de verdad pasan cerc

PARA ARTISTAS

- Publica tu concierto y enlaza tus reels: los fans te descubren viéndote.
- Vende entradas en la app. Sin filtros ni listas de espera.
- Cobra directamente en tu cuenta bancaria.
- Una comisión justa y clara del 5%, siempre a la vista, y libre para seguir vendiendo por tus p
- Escanea entradas en la puerta desde tu móvil.

Primero Madrid. Pronto más ciudades.

5. Categories, ratings & settings (the fields you pick)

Google Play

- **App category:** Music & Audio
- **Tags:** live music, concerts, events, tickets, local (pick the closest offered)
- **Contact email:** vir@aurasonic.es · **Website:** <https://madgigz.aurasonic.es>
- **Privacy Policy URL:** [!] REQUIRED — see To-dos below
- **Contains ads:** No
- **In-app purchases:** No (tickets are a real-world service paid via Stripe, not Google digital goods)
- **Target audience / age:** 16 and over (the app has a 16+ age gate)
- **Content rating:** complete the IARC questionnaire honestly. Expect **PEGI 12 / Teen** — no violence, sex, or profanity, but the app has **user-generated content** and social features. Declare: no restricted content; yes to user-generated content + user interaction.
- **Category of app:** App (not Game)

Apple App Store

- **Primary category:** Music · **Secondary:** Entertainment
- **Age rating:** complete the questionnaire. Expect **12+**, driven by **user-generated content**. Answer **No** to "Unrestricted Web Access" (the app only loads its own site). You must confirm you have **content moderation, a EULA, and block/report tools** for UGC — MadGigz has moderation + reporting, so this is fine.
- **Support URL / Marketing URL:** <https://madgigz.aurasonic.es>
- **Sign-In required for review:** YES -> provide a demo account (see To-dos)
- **Export compliance:** the app uses only standard HTTPS encryption -> normally **exempt** (answer "Yes, uses encryption" -> "exempt / standard").
- **Content rights:** you own or have rights to all content shown. Yes.
- **Advertising Identifier (IDFA):** No (the app does not use it)

6. Data safety (Google) & App Privacy (Apple)

Recommended answers based on how the app works today. Review against your own data handling and T&Cs before submitting — this is a declaration, not just copy.

Data	Collected?	Linked to user	Purpose	Notes
Email address	Yes	Yes	Account / sign-in	Not shared
Name / username	Yes	Yes	App functionality	Username & artist name shown publicly
Profile photo	Yes	Yes	App functionality	Publicly shown
User content (reels, posts)	Yes	Yes	App functionality	Publicly shown; moderated
Date of birth	Yes	Yes	Age verification (16+)	Not shared, not displayed
Purchase history (tickets)	Yes	Yes	App functionality	—
Payment info (card)	No (handled by Stripe)	—	Payments via Stripe	App never sees/stores card data
Precise or approximate location	No	—	—	City is chosen, not read from GPS
Advertising / tracking data	No	—	—	No cross-app tracking, no ads

Security & rights (both stores):

- Data **encrypted in transit** (HTTPS): Yes
- Users can **request deletion**: Yes — in-app (Settings) and at <https://madgigz.aurasonic.es/delete-account>
- Data **not** used for third-party advertising or cross-app tracking
- Apple "App Privacy": data is **linked to the user** but **not used to track** you across other companies' apps

7. Assets you must supply (specs)

Google Play

- **App icon:** 512 × 512 px, 32-bit PNG, ≤ 1 MB — [OK] have it (`public/icons/icon-512.png`)
- **Feature graphic:** 1024 × 500 px, PNG/JPG — [!] TO CREATE (required; a branded banner)
- **Phone screenshots:** 2–8 images, portrait 9:16 (e.g. 1080 × 1920) — grab from the A07
- **Tablet screenshots:** optional
- **Promo video (YouTube):** optional

Apple App Store

- **App icon:** 1024 × 1024 px, PNG, no transparency, no rounded corners — [OK] have the source
- **iPhone screenshots (6.9"):** 1320 × 2868 px (or 6.7" = 1290 × 2796), 1–10 images — REQUIRED
- **iPhone 6.5" screenshots:** optional fallback (1242 × 2688)
- **iPad screenshots:** only if you ship iPad support (not required — iPhone app)
- **App preview video:** optional

Screenshot tip: capture 4–6 of the strongest screens on the A07 / a phone — the reel feed, This Week, an artist profile, the ticket + QR, checkout. Same shots work for both stores (Apple just needs them at the exact pixel sizes above).

8. To-dos before you can submit (not copy — actions)

1. **[!] Privacy Policy URL — REQUIRED by both stores.** You have `/delete-account` but not a full privacy policy page yet. This is a hard gate. (*I can draft a bilingual privacy-policy page for madgigz.aurasonic.es — just say the word.*)
2. **Demo account for review.** Both stores' reviewers need to log in. Create a test fan account with **email + password** (not Google — reviewers won't use your Google login), and note it in the review notes. Consider a second artist demo account so they can see the artist side too.
3. **Feature graphic** (Google, 1024×500) — needs designing.
4. **Screenshots** at the exact sizes above.
5. **Content rating / age questionnaires** — answer per section 5.
6. **Data safety / App Privacy** — enter per section 6.
7. **Apple only, keep in mind:** guideline **4.2** can reject thin "website wrapper" apps for the *public* App Store. Internal **TestFlight** needs no review, so that path is clear now; the public App Store may need more native feel first. Google Play (TWA) has no equivalent block.
8. **Payments:** live Stripe stays gated on your T&Cs/gestor sign-off. Ticket sales are a real-world service (not a digital good), so store IAP does not apply — but confirm that classification when you submit.
